

Getting started with the Bridge

Access to the Bridge is granted in two steps: Adobe enables your organization, and then your Admin Console administrator assigns each user a Bridge role. Adobe does not enable individual users by default.

Part 1: Assign Bridge roles to users

Bridge access is based on assigned roles. Only an Admin Console administrator for your organization can assign roles. Granting a user access is a two-step process:

- 1. Ensure that the user is part of your organization. Existing users who are already part of the organization only need a role assignment. Proceed directly to Assign a role. New users must first be added to the organization.
- 2. Assign a Bridge role to the user. The assigned role determines the user's level of access in the Bridge.

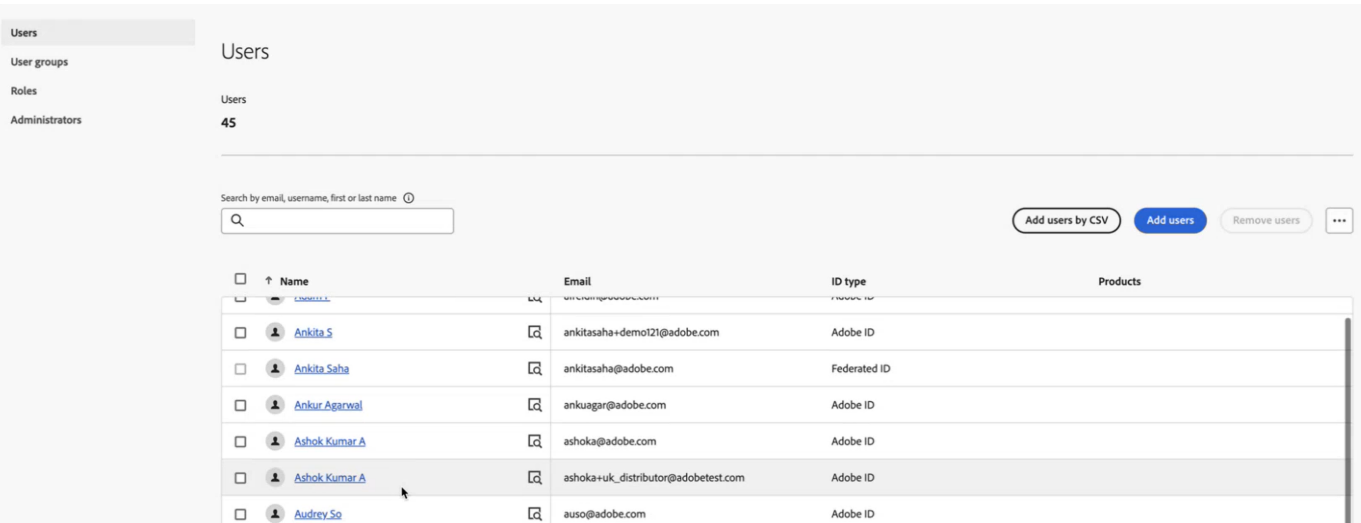

Bridge roles

Role	Access
Bridge Admin	Full read-write access to the Bridge.
Bridge Viewer	Read-only access to the Bridge.

Only users assigned the **Bridge Admin** or **Bridge Viewer** role can sign in to the Bridge. These roles are managed by Adobe and cannot be deleted by administrators.

Make user part of the organization

- 1. Sign in to [Adobe Admin Console](#) using the admin account provided for your distribution.

- 2. From the Users tab, select **Add users**.
- 3. In the **Add users to your team** dialog box, enter the details of the user to be added and select **Save**.

Add users to your team

You can add up to 10 users below by entering their email addresses.
Need to add many users? Go to the [Users tab](#), then click on **Add users by CSV**.

Repeat this procedure whenever you need to add users or modify existing role assignments.

Part 2: Sign in and select your distribution

Once a user has been assigned, they can sign in directly:

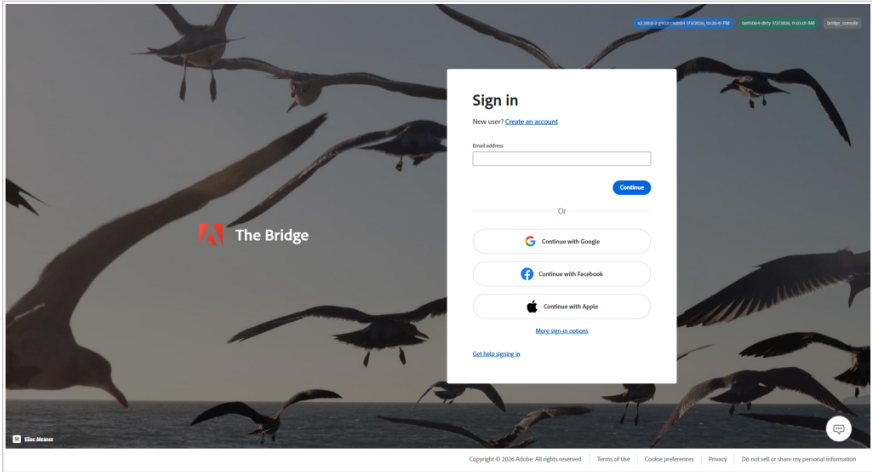

- 1. Go to <http://bridge.marketplace.adobe.com/>.
- 2. Sign in using the Adobe credentials that were assigned a **Bridge Admin** or **Bridge Viewer** role.

02

Sign in

BRIDGE: LOGIN

Go to bridge.marketplace.adobe.com and enter your Adobe credentials.

Adobe
