

Supported features

The Bridge supports a growing subset of the workflows available through the Commerce Partner APIs. This page lists the features that are currently available in the Bridge UI, the navigation path for each feature, and the capabilities that still require direct API integration.

This list will expand as the Bridge adds more API workflow coverage.

Supported in the Bridge UI

Feature	UI path
Sign in and select a distribution	Sign in at bridge.marketplace.adobe.com > Personal Account > select organization > select distribution
Switch between distributions	Organization or distribution picker, top right, available from any screen
